So far it's perfect. Hope it continues to be developed.. **THIS GAME IS GOOD!!!**. This collection would have been fantastic if there were options to change resolution. Battle Royale is stuck in a crappy purple boarder. (which isn't shown in the video on the store page, something I find extremely deceptive.) This'll be a thumbs down for me until they fix something which could be standard in any PC release.. VR Only Review!

It's a very good Mystery/Story/Puzzle solver game, very polished graphics.

Not really my type of game, but a 8/10 Game as I have an definite urge to complete a game I normally get bored with.

Personally I'd Rather be shooting everyone in the face than looking through drawers and reading emails in offices, but the story is good, the chopping between two characters is good and keeps you interested

Well worth a Play

With a few out of game issues...

It Could do with Motion controller support, Xbox controller? S**t do I have an Oculus?

It doesn't show up as a VR game yet, which makes it hard to find with the HMD on. This game is too frustrating. I cannot recommend it. I even got it for only 30 cents and I still dislike it.

Awesome, smooth, most atmospheric game I've ever played. Will definitely play it in VR as well!
Best ending in a game ever, period.

Absolutely recommend.. Hours of mindless fun. Good for when listening to audio books.. Exceptionally annoying. Noisy.
Poorly made.
Don't bother.

<https://youtu.be/V8CfhrbUxDrY>. So I'll get this out of the way, I myself love this game, but that is STRICTLY because I played it when I was like 7 years old. I would never recommend this game to anyone though. It's fraught with flaws.

[First of all, the UI is extremely odd, and can be very confusing to navigate. The whole game is a clicking simulator, which isn't bad for some, as games of the like are usually great ways to pass the time, which is one redeeming factor the game has. The art. HOOOOOLY CRAP the art. The whole game is literally clip art images that you can easily find on google, some of which have been animated very simply \(we're talking a few pivot points on some images in like, Adobe AfterEffects\). The music and sound effects are maddingly repetitive, as well as the "battle" sequences which are just some more clicking \(if you win you get some stuff if not oh well\).](#)

[Essentially, this game is horrendous, if you buy it, use it to waste time and only to do so. If you have some nostalgia to deal with like I did, go right ahead. I love this game sure, but that doesn't make it good. Sort of like loving a terrible, terrible, movie.](#)

[TL;DR: I played this game as a kid and loved it, still love it, but it's still terrible.. It's good, but not Fallout 4 good. . Good RPG mythological game](#)

[7/10 Very good. Probably the best game I have ever played in my entire life, soo much content it is unreal, the mechanics in the game are the most advanced ever, and the graphics are extrordinary.. Plz give options. The music is bad.](#)

[I mean, im a fan of games like this. I'm weird like that. but this is uhm...](#)

[It could be better? its really kinda janky, it feels like its somebody's first project, which is why i don't wanna be like "THIS GAME ISN'T GOOD \u2665\u2665\u2665\u2665 YOU"](#)

[I like all the options, and being a witch is cool.
but it could do with some quality upgrades. Maybe take some lessons from harvest moon or story of seasons.. Excellent, very underrated game. I think a lot of people dislike it for two main reasons:
-You actually need to think about where your projectile will go, rather than a lot of games where you just point and click to kill enemies
-And that the gameplay is repetitive.](#)

[But think about this.
TF2. Overwatch. Nearly every multiplayer objective-based shooter ever.
They're all extremely repetitive, even more so than this.
What difference does it make if you're fighting AI that isn't actually brain-damaged for once rather than people?
If this was multiplayer rather than singleplayer, literally nobody would complain about the repetitiveness. And that bothers me.
And that is why this only has 57% positive reviews.](#)

[The gameplay might be the same but there are very varied maps and a wide variety of environments, more than can be said for some online multiplayer shooters.](#)

[You move a bit slow, but you can solve that by being patient. The power shards are a \u2665\u2665\u2665\u2665\u2665 to collect in big enough numbers to do anything significant, but that stops you blazing through the levels with ease. Some of the maps are confusing as hell to navigate, but it was the dev's decision to add in a maze-y aspect to some of the maps. I don't have a problem with it, it just takes me longer.](#)
